THATO RAPHOLO

Cloud & DevOps Engineer

📧 rapholothato3@gmail.com | 📍 Pretoria, South Africa | 🔗 LinkedIn | 💻 GitHub | 🌐 Portfolio

PROFESSIONAL SUMMARY

Motivated Cloud Engineer transitioning from education to cloud infrastructure with strong foundations in AWS, Azure, and DevOps practices. Currently enrolled in CAPACITI's intensive Cloud & DevOps training program. Demonstrated ability to learn quickly, solve complex problems systematically, and communicate technical concepts clearly. Possess 5 industry-recognized certifications and hands-on experience building scalable cloud solutions. Bringing unique perspective from education background: structured thinking, user-centered design approach, and ability to explain complex technical concepts accessibly.

TECHNICAL SKILLS

Cloud Platforms

- AWS: EC2, S3, VPC, Lambda, CloudFront
- AWS: Route 53, RDS, IAM, CloudWatch
- Google Cloud Platform
- Microsoft Azure

DevOps & Tools

- Docker, Kubernetes
- Terraform, Infrastructure as Code
- CI/CD: GitHub Actions, CodePipeline
- Git, GitHub

Programming & Scripting

- Python: Automation, AWS SDK
- Bash: Shell scripting

- YAML: Configuration management
- HTML/CSS/JavaScript

Core Competencies

- Cloud architecture design
- Infrastructure automation
- Technical documentation
- Problem-solving & troubleshooting

CERTIFICATIONS

AWS Certified DevOps Engineer – Code, Build, and Test

Amazon Web Services | 2025

AWS Certified Cloud Practitioner – Essentials

Amazon Web Services | 2025

Google Cloud: Introduction to Generative AI

Google Cloud | 2025

Microsoft Power Platform Fundamentals

Microsoft | 2025

Google Analytics Certification

Google | 2025

CLOUD PROJECTS

Portfolio Website

Live: trapholo01.github.io/portfolio | GitHub: github.com/Trapholo01/portfolio

- Built and deployed responsive portfolio website showcasing cloud engineering journey
- Implemented modern web design with HTML5, CSS3, and JavaScript
- Deployed using GitHub Pages with custom configuration

HTML **CSS** **JavaScript** **Git** **GitHub Pages**

AWS Infrastructure Labs

In Progress

- Designing and implementing scalable VPC architecture with Terraform

- Building multi-tier web application with auto-scaling and load balancing
- Implementing security best practices and high availability patterns

AWS Terraform VPC EC2 IaC

CI/CD Pipeline Demo

Planned

- Automated deployment pipeline with GitHub Actions
- Docker containerization for consistent environments
- Cloud deployment automation to AWS ECS

GitHub Actions Docker AWS ECS CI/CD

PROFESSIONAL EXPERIENCE

Cloud & DevOps Engineer in Training

CAPACITI | 2025 - Present

- Completing intensive training in AWS, Azure, GCP, Docker, Kubernetes, and Terraform
- Building hands-on experience with cloud infrastructure, automation, and DevOps practices
- Earned 5 industry-recognized certifications in cloud technologies
- Developing portfolio of real-world cloud projects demonstrating practical skills

Education Professional

STADIO Higher Education | 2022 - 2025

- Developed strong communication skills explaining complex concepts to diverse audiences
- Created structured learning programs and systematic problem-solving approaches
- Managed multiple projects simultaneously with attention to detail
- Built user-centered solutions focused on accessibility and effectiveness

KEY ACHIEVEMENTS

✓ Transitioned from education to cloud engineering in under 6 months

✓ Earned 5 cloud certifications while building practical portfolio

✓ Built and deployed live portfolio website using modern web technologies

✓ Completed AWS DevOps certification demonstrating advanced cloud knowledge

✓ Developed strong foundation in multiple cloud platforms (AWS, Azure, GCP)

EDUCATION & PROFESSIONAL DEVELOPMENT

Cloud & DevOps Engineering Program

CAPACITI | 2025 - Present

Intensive training in AWS, Azure, GCP, Docker, Kubernetes, Terraform, and CI/CD practices

Currently Learning

Kubernetes Administration | Advanced Terraform | CI/CD Pipelines | Python for DevOps | AWS Solutions Architect

ADDITIONAL INFORMATION

Availability: Immediately available for entry-level Cloud Engineer or DevOps roles

Work Authorization: Authorized to work in South Africa

Preferred Locations: Pretoria, Johannesburg, or Remote
